# AMABELLE TRACHTENBERG

## Full-Stack Developer

## ABOUT ME

Curious, adventurous, and lively. Passionate about coding and collaborating on projects. Great at debugging:) Can do!

## EXPERIENCE

### Full-Stack Developer - Taytan-Tech. *1/2023- current*

- As a full-stack developer in a small startup, I am responsible for developing a dynamic web application using **React.js, Typescript**, **Node.js** & **MongoDB**.
- Developed multiple pages allowing users to search for relevant travel files using various parameters, using MongoDB queries to retrieve the necessary data and seamlessly present the results in **Material-UI** tables on the user interface.
- Designed and built a comprehensive user-permissions system from scratch. Users can create and manage roles with distinct permissions, enhancing the application's security and access control.
- Developed end-to-end tour registration functionality, covering both client and server. Allowing passengers to book their desired tour.
- Collaborated with my team to gather requirements, design system architecture, and implement new features.
- Conducted thorough testing and debugging to identify and resolve issues, ensuring the application's stability and performance.

### Full-Stack Developer - Junex / Psagot. *5/2022 - 12/2022*

- Collaborating as a team, Developing an app for the graduates and students of Psagot - a non-profit organization, educating teens in the periphery for excellence.
- Stack: **React.js** (& **Redux toolkit**) on the client side, **node.js & express.js** on the server. **MySql** for DB.
- In my role, I held the responsibilty of handeling the graduates section. Rendering a list of graduates in the dashboard and seperate page, and implementing filtering to enhance data exploration and search capabilities.

### Full-Stack Developer  - *Novvo (5/2021)*

- Developed the front-end of a new startup company with **React.js**, **styled-components**, **storybook**, **docker**-compose, and more. The design was given using **inVision** prototypes
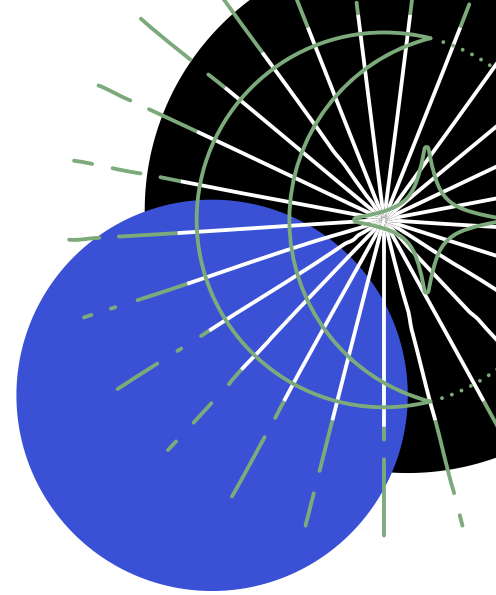

### Frontend Developer internship - *willingApp (2020-2021)*

- Writing the dashboard of the management app with **React.js.**
- Among other things, I implemented a **Canvas.js** graph in a react component, used a **Bootstrap** date-picker for user interaction, and connected it all with **Axios** to the server.

## PROJECTS

### My Protfolio

- Check out old junior projects in my protfolio, or on github:
- https://amabelle-protfolio.web.app/projects
- https://github.com/amabelleS?tab=repositories

## CONTACT DETAILS

- Mobile: 050-458-8181
- Amabelledev@gmail.com

- https://www.linkedin.com/in/amabelle-trachtenberg
- **https://github.com/amabelleS**

## TECK STACK

**CSS, HTML, JS, Typescript.
Next.js, React.js, Node.js, Redux, Angular, Vue.js, Express, Nest.js, MongoDB, Mongoose, SQL, PostgreSQL, Firebase, Lerna, Docker, Styled-components, Storybook, and more
CI-CD: Trello, Jira, Git & Github.**

## SOFT SKILLS AND ABILITIES

- Great communication and interpersonal skills
- Self-taught. team player. big picture focus & attention to detail.
- Fluent in English

## EDUCATION

### Front-end development

SVcollege

- Implemented during the course by small web apps with Html, CSS, JavaScript, and React.js

### Web Basic Course

SheCodes

- HTML, CSS, JQuery, JavaScript & Typescript.

### Cognitive Psychology

Haifa university

- **Graduated wuth honors**– 96.3 average
- Final project in UI/UX design – 100:)
